REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The specific limitations of "an air control system that has a cover element which is adjusted to partially cover the air channel in a manner such that the air channel is always at least partially exposed to ambient" is not anticipated or made obvious over the prior art of record in the examiner's opinion. For example, 5,613,890 to DeMars teaches having a cover element 72 which adjust to aligned with air opening 68 to control air flow but this configuration does not allow for partial ambient exposure at all times but when the trigger is pressed to move the plate from a non-aligned to an aligned position (col. 4 lines 45-55).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
